1. Introduction

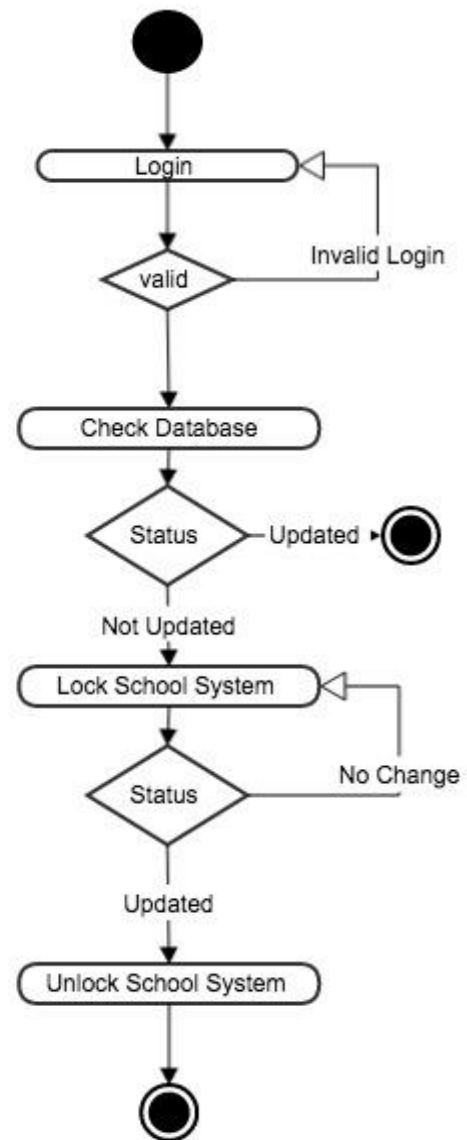

Tele – Education is aimed to address various obstacles that students in present Government rural educational institutions face due to distance and/or socio-economical constraints and lack of quality education. Tele - Education overcomes these shortcomings by providing satellite based LIVE quality training with multimedia content for rural students from V to X Standard, which can reach multitudes, cost effectively. Tele Education project is currently running on 1000 schools of Karnataka state. The main objective of Tele – Education project is to bridge the gap in quality of education being provided in urban and rural areas; particularly in government schools, and elevates the learning levels of the students in Mathematics, Science and English (Grammar).

2.) Class Diagram

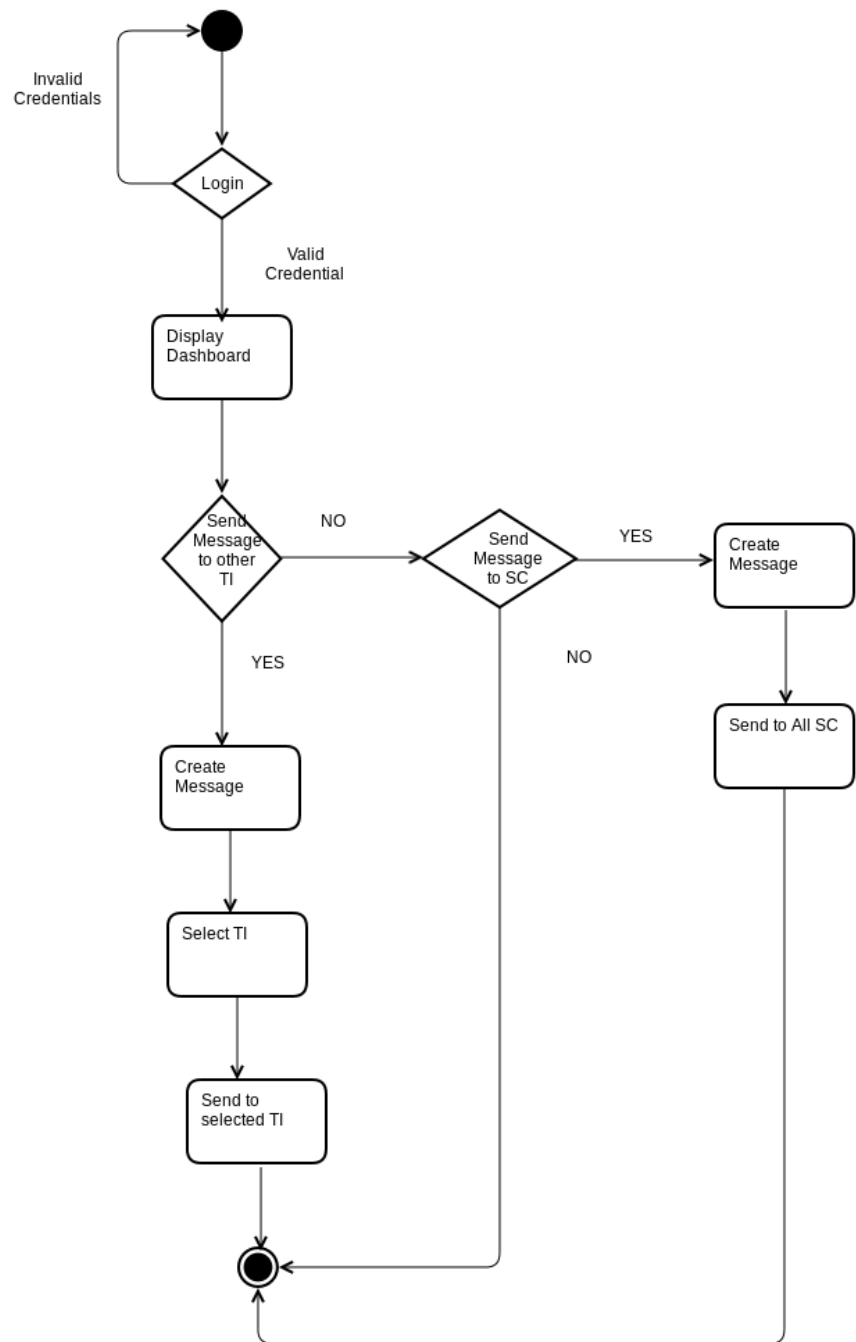

3.) Activity Diagram

AD1. Database Issue

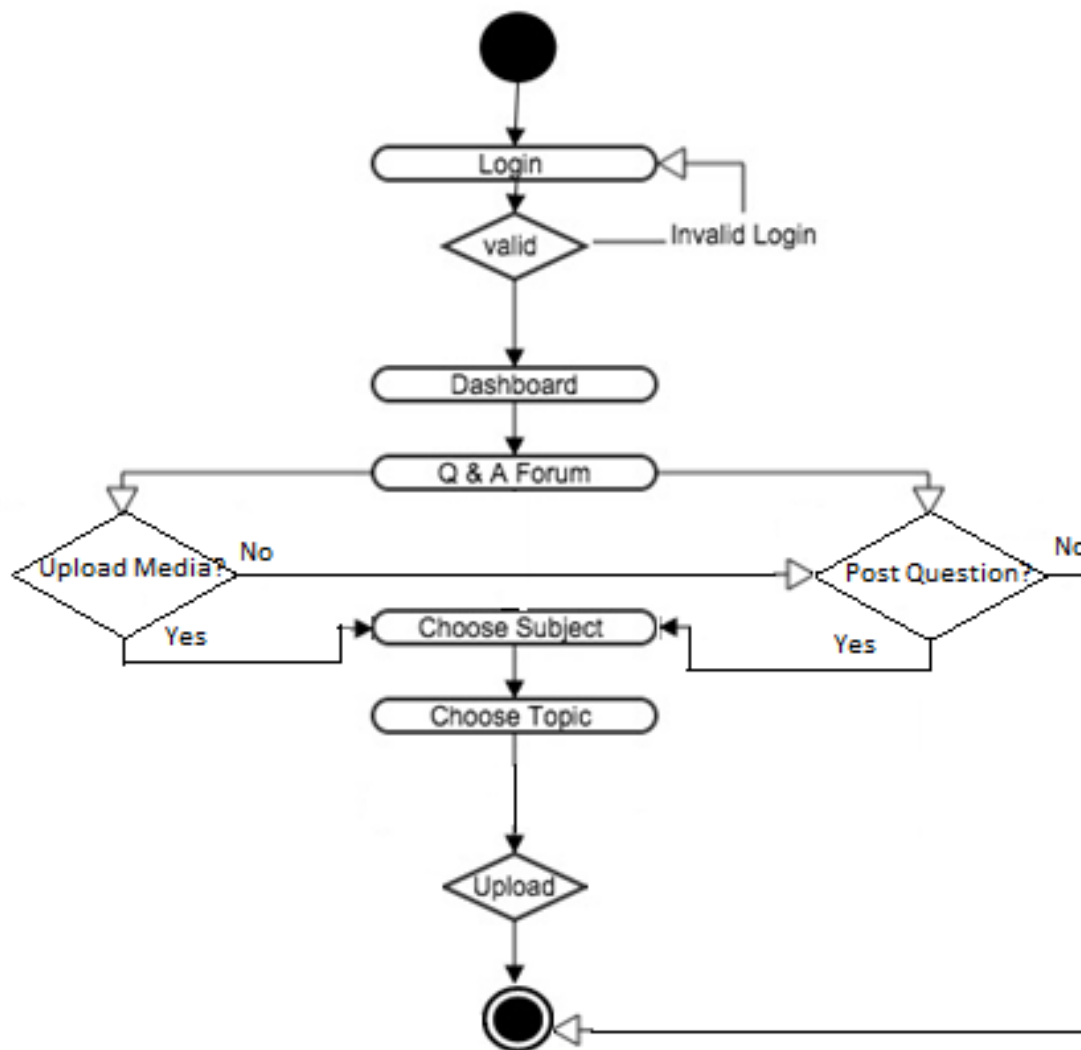

The following activity diagram shows how the TI will take action against the SC if the information is not submitted by SC.

Ref: R3.0

AD2. System Issue

The following activity diagram shows how the TI will take action if the system is not working in the school.

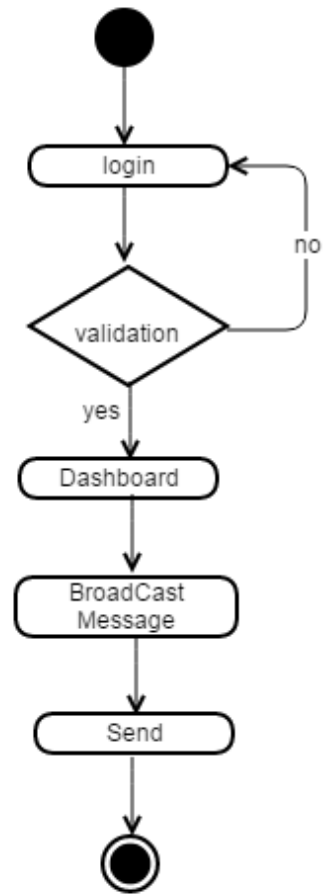

Ref:

AD3. Question and Answer Upload

The following activity diagram shows how the TI will upload the question and answer that can be seen by other TI's.

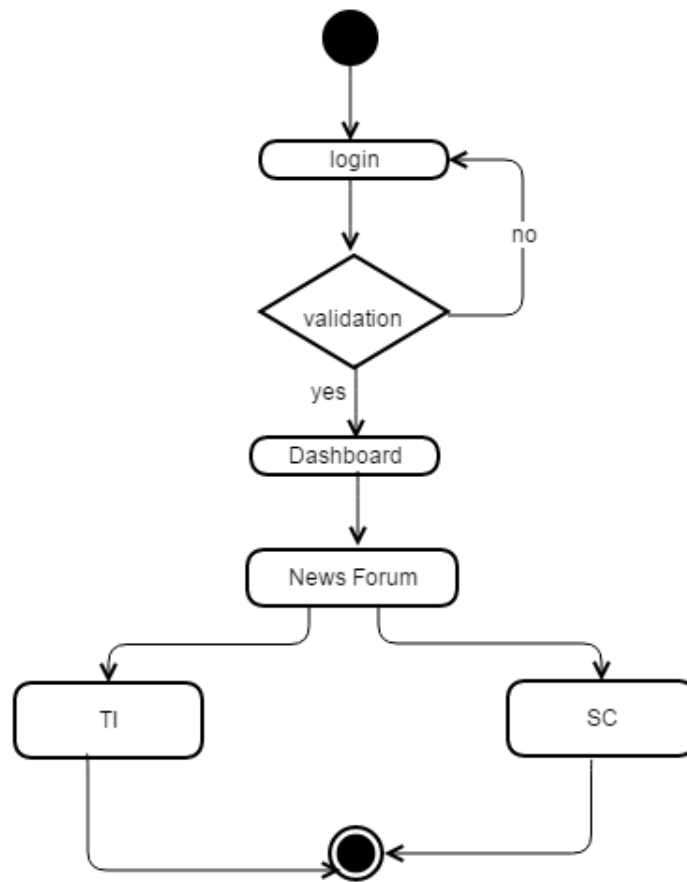

Ref:R1.0,R1.1,R1.1.1,R1.1.2,R1.2

AD4. Broadcast Message

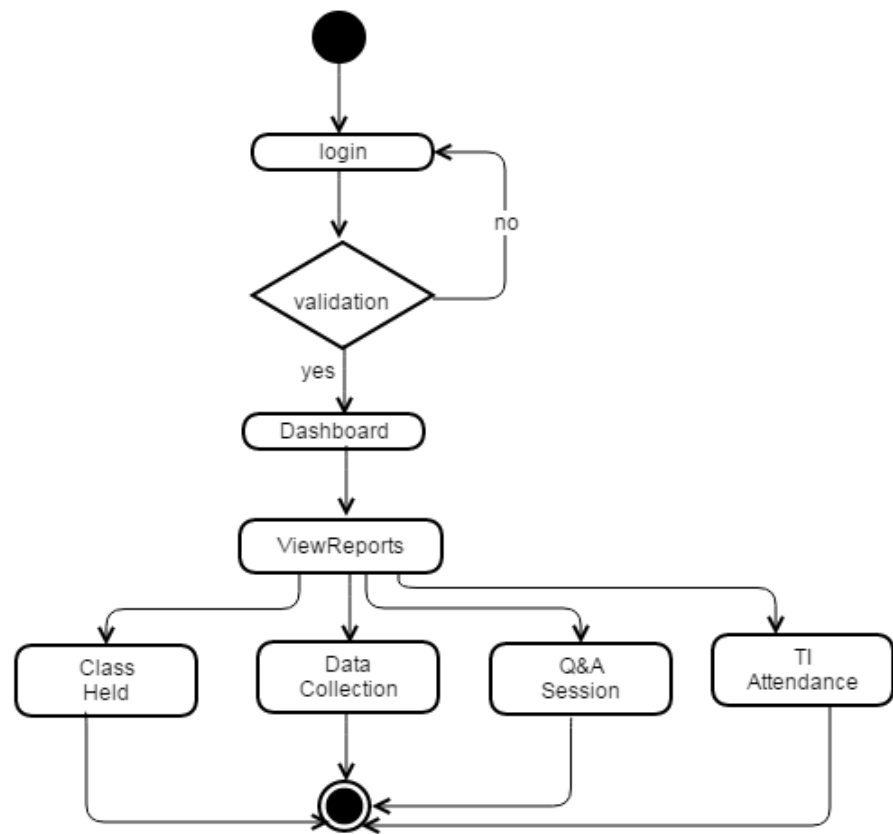

The following activity diagram shows how the message will be broadcasted by TI to SC and by HA to TI.

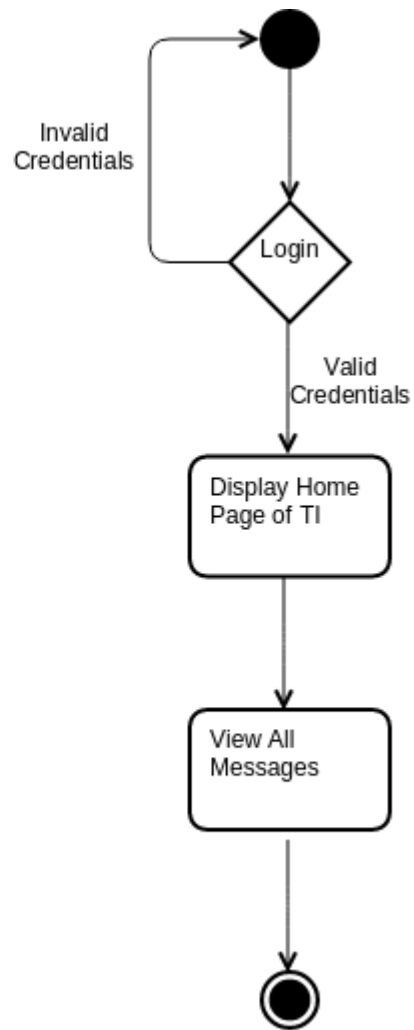

Ref:R4.1

AD5. View News Forum

The following activity diagram shows how the TI and SC will see the message in the news forum.

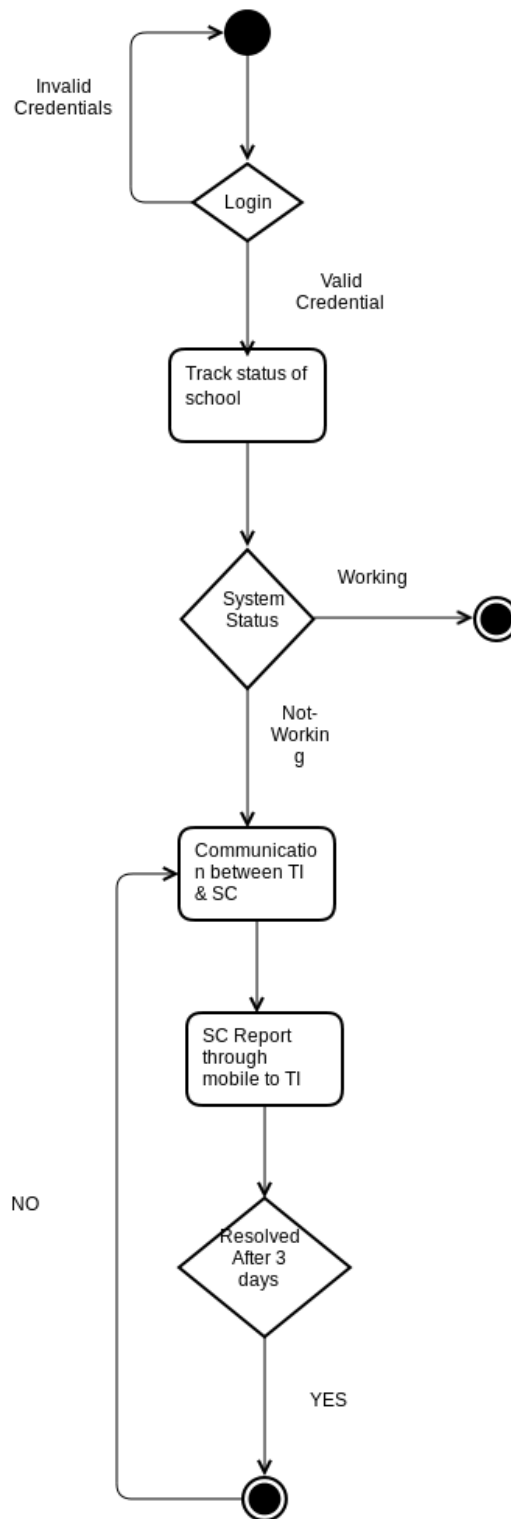

AD6. View Report

The following activity diagram shows how the monthly reports will be generated which contains the report of whole month.
Ref:R5.0

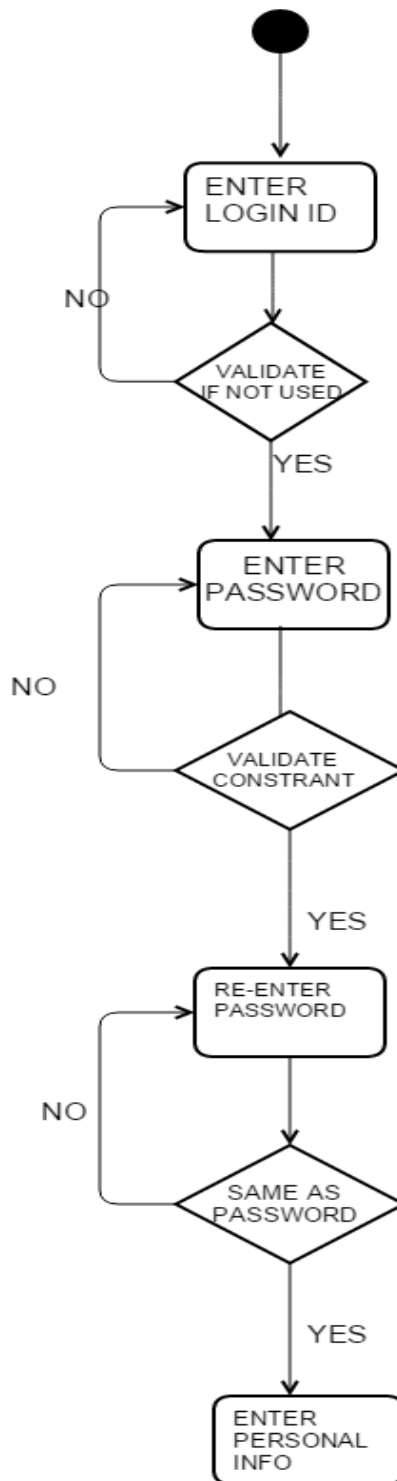

AD7. View Messages

The following activity diagram shows how the TI will view the messages after logging into the system.

Ref:R1.4

AD8. Send Message

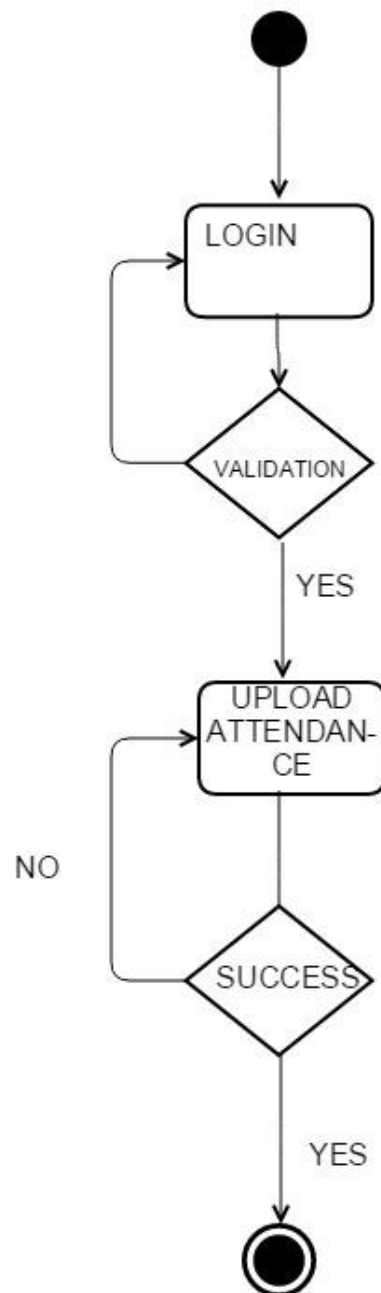

The following activity diagram shows how the TI will send the message to other TI's and to the SC.
Ref:R1.4.1,R1.5,R1.5.1,R4.0

AD9. Login

The following activity diagram shows how the user will login.
Ref: R4.2

AD10. Issue Reporting

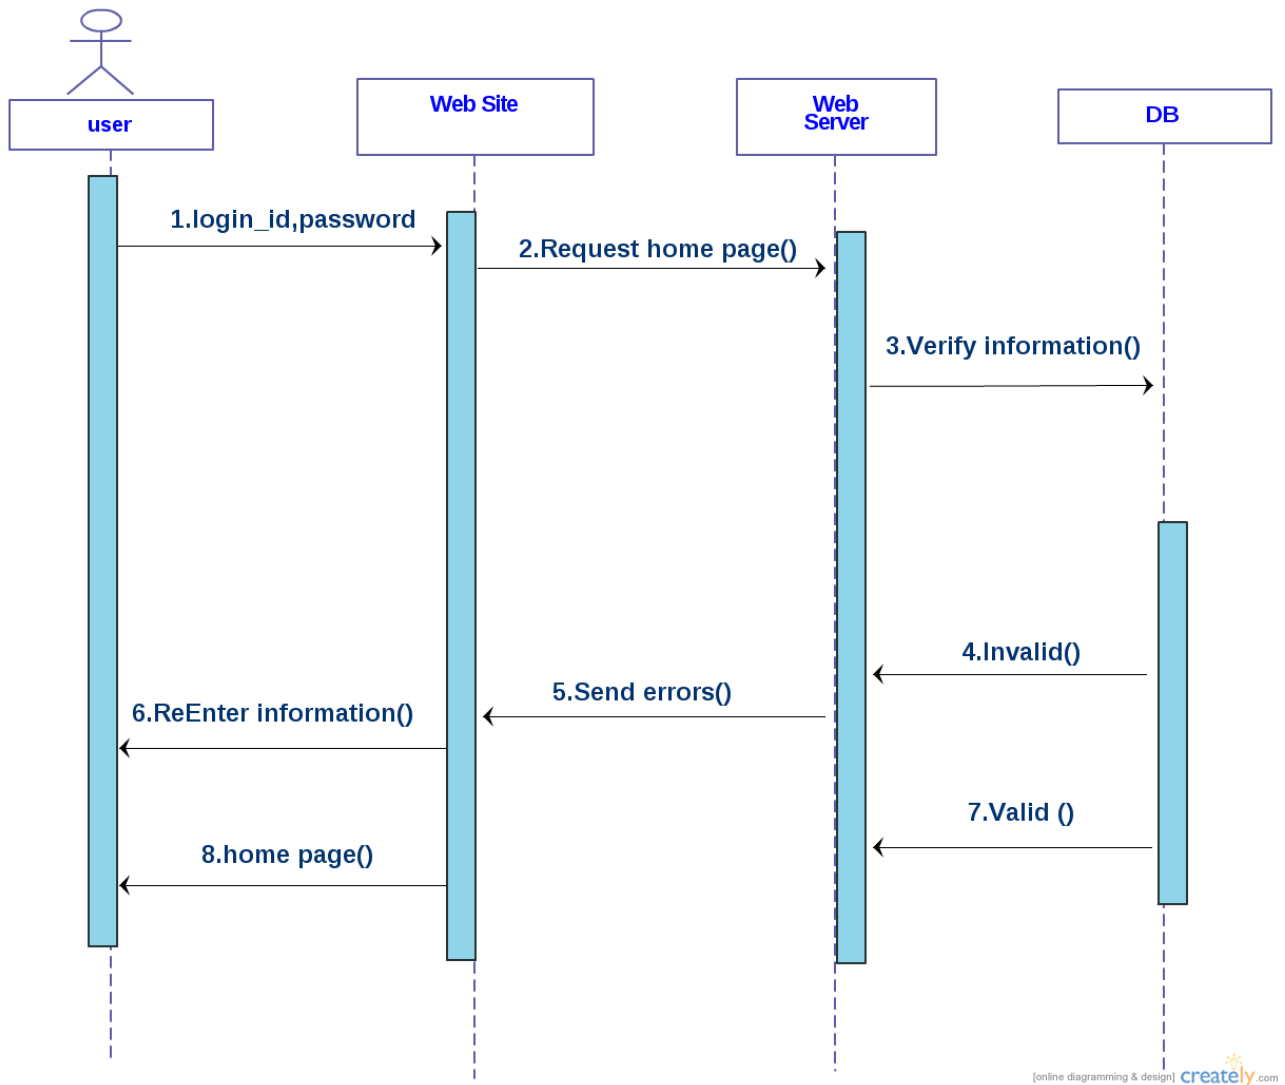

The following activity diagram shows how the SC will enter the issue
Ref:R1.5

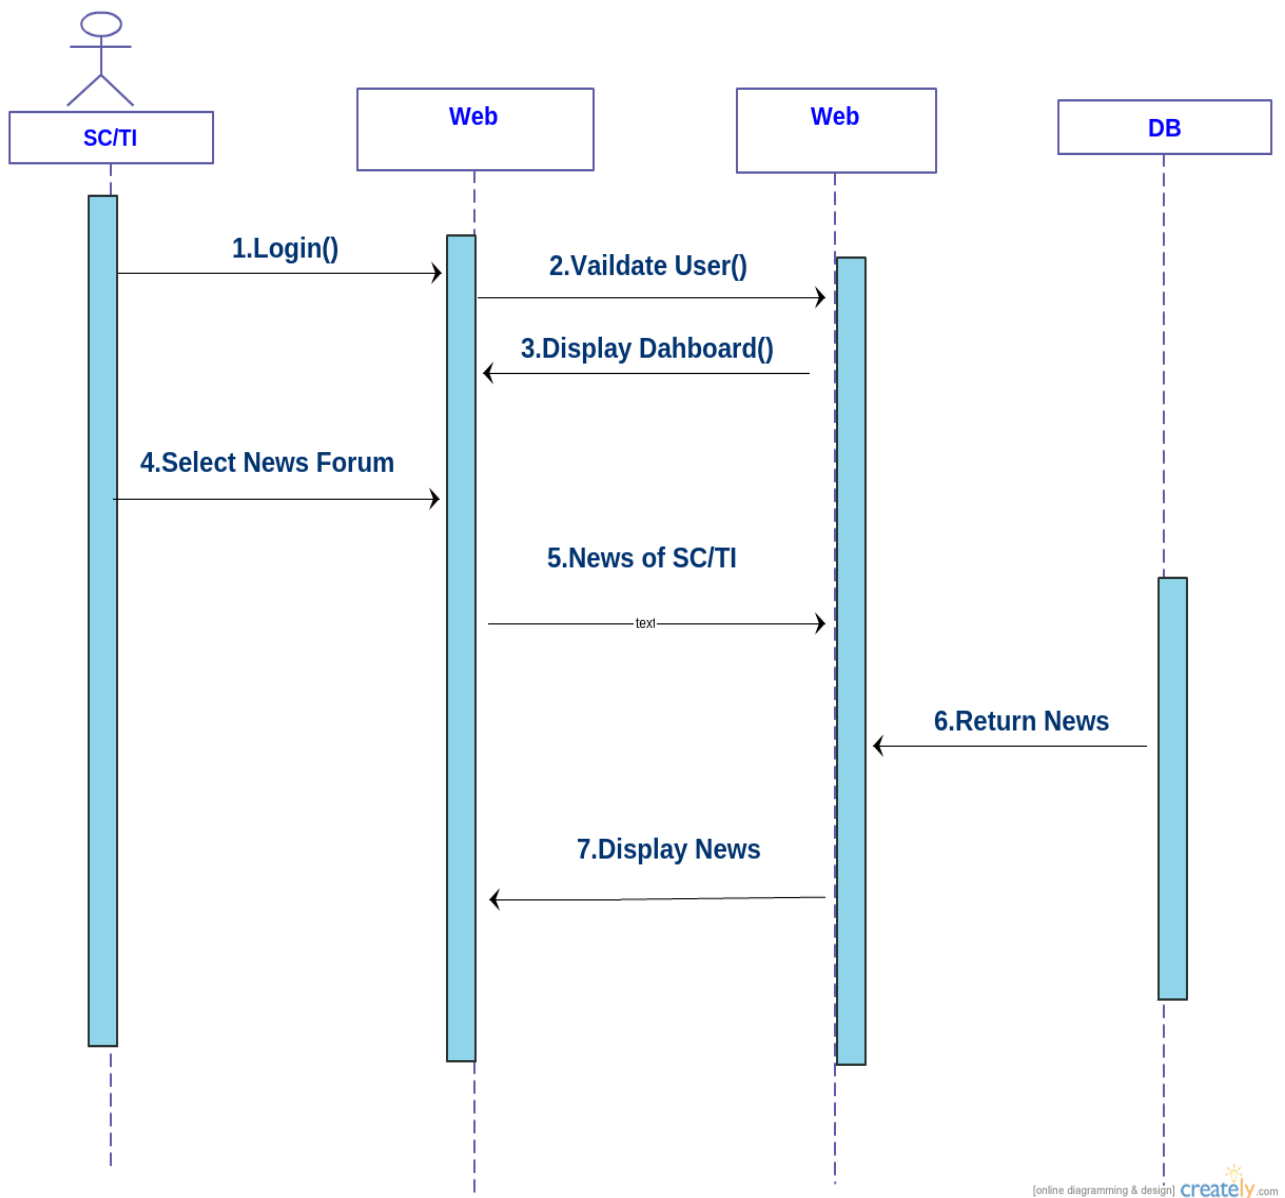

AD11. Add Attendance

The following activity diagram shows how the SC will upload the attendance of the students.

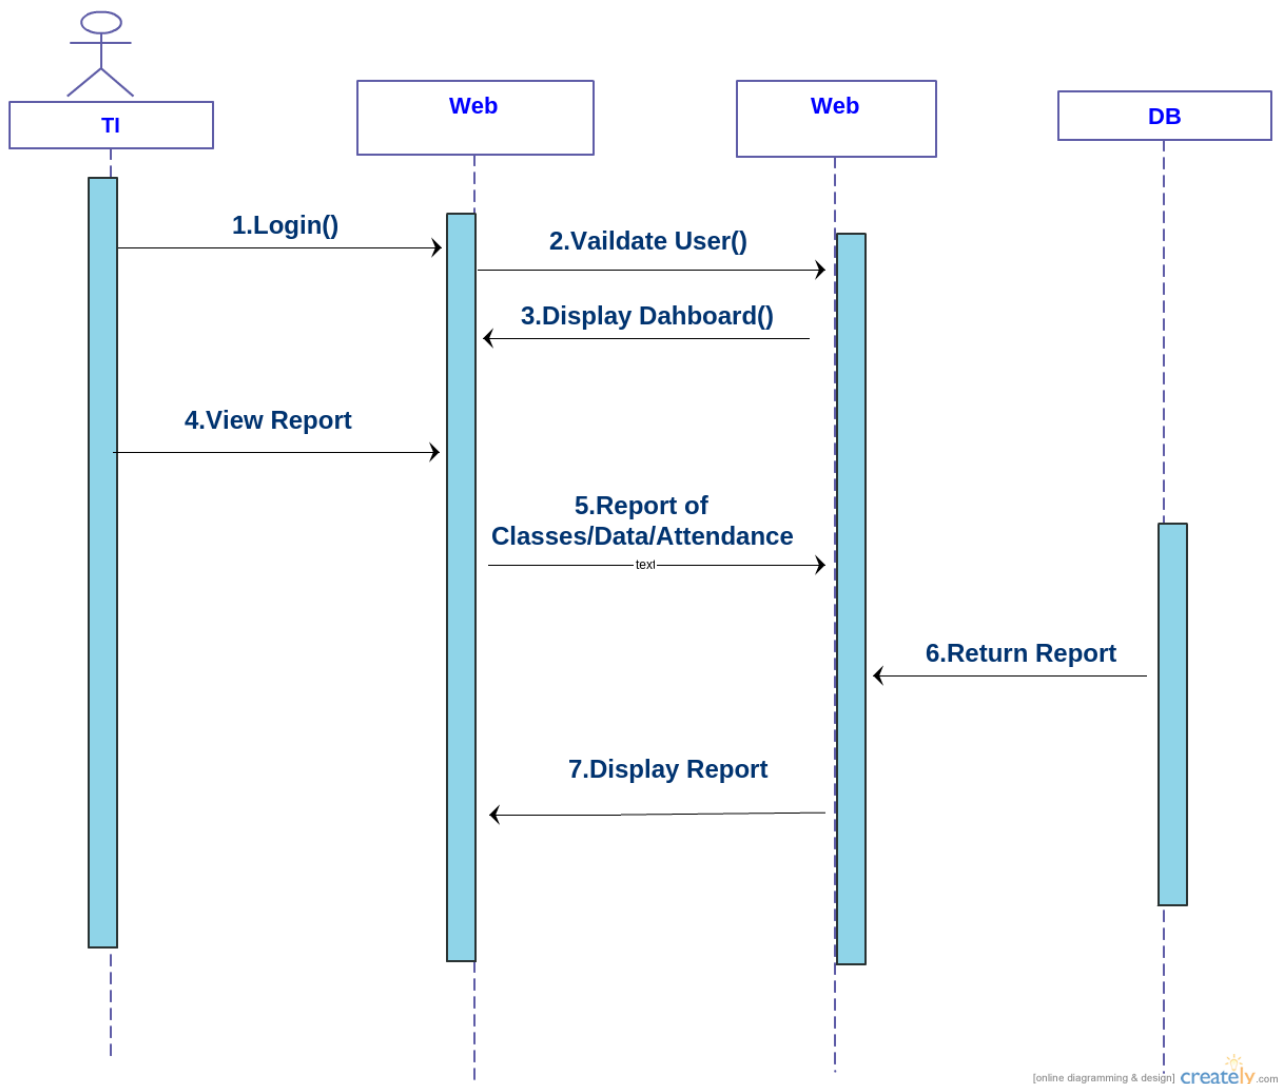

4.) Sequence Diagrams

1. Login: Ref: AD9

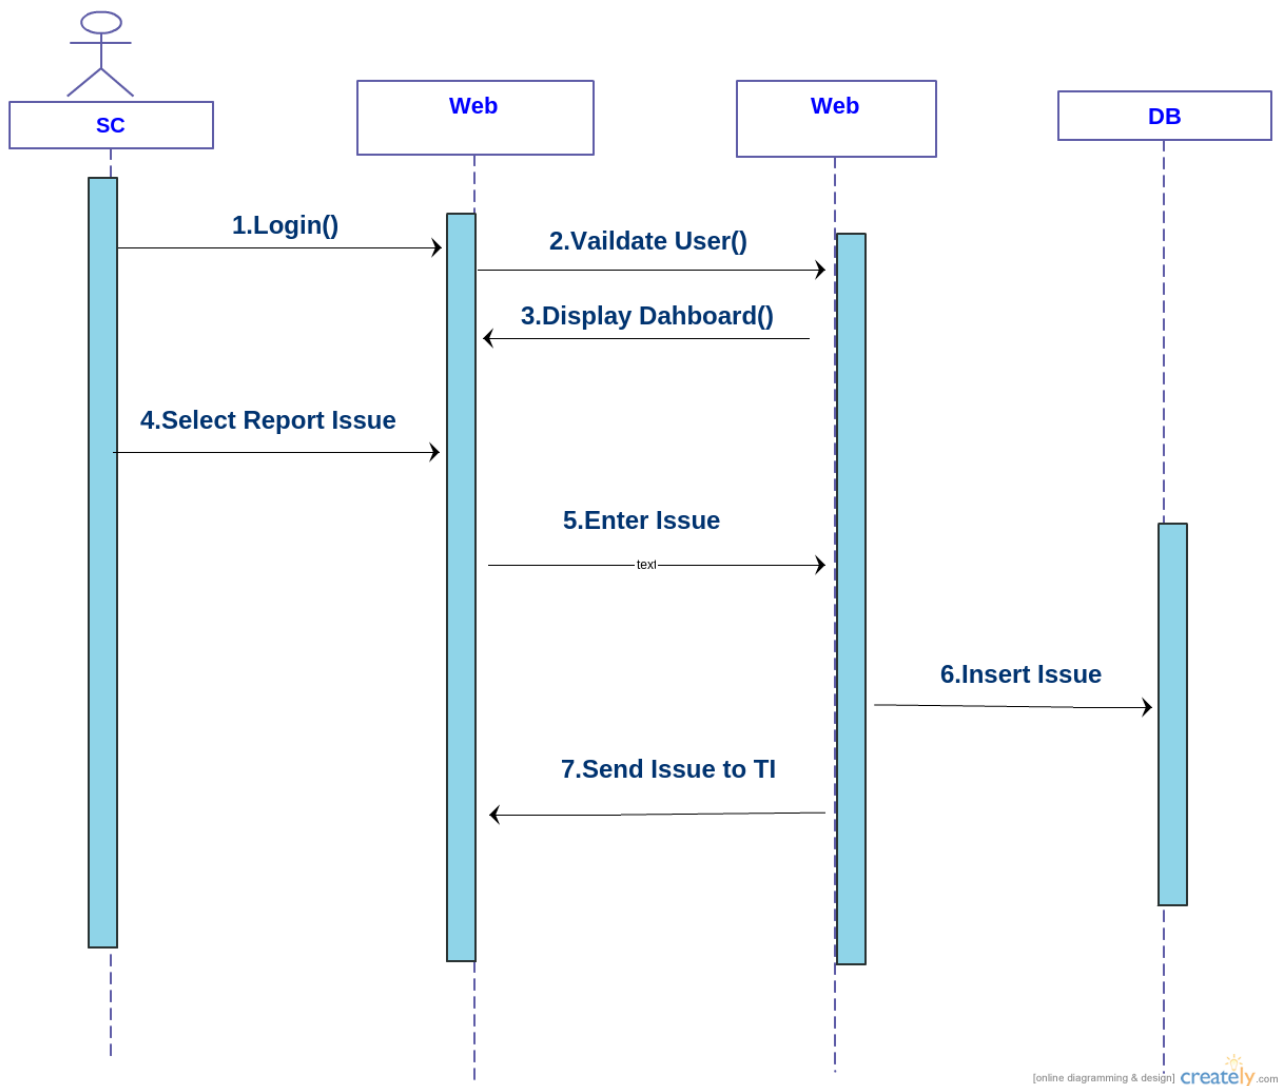

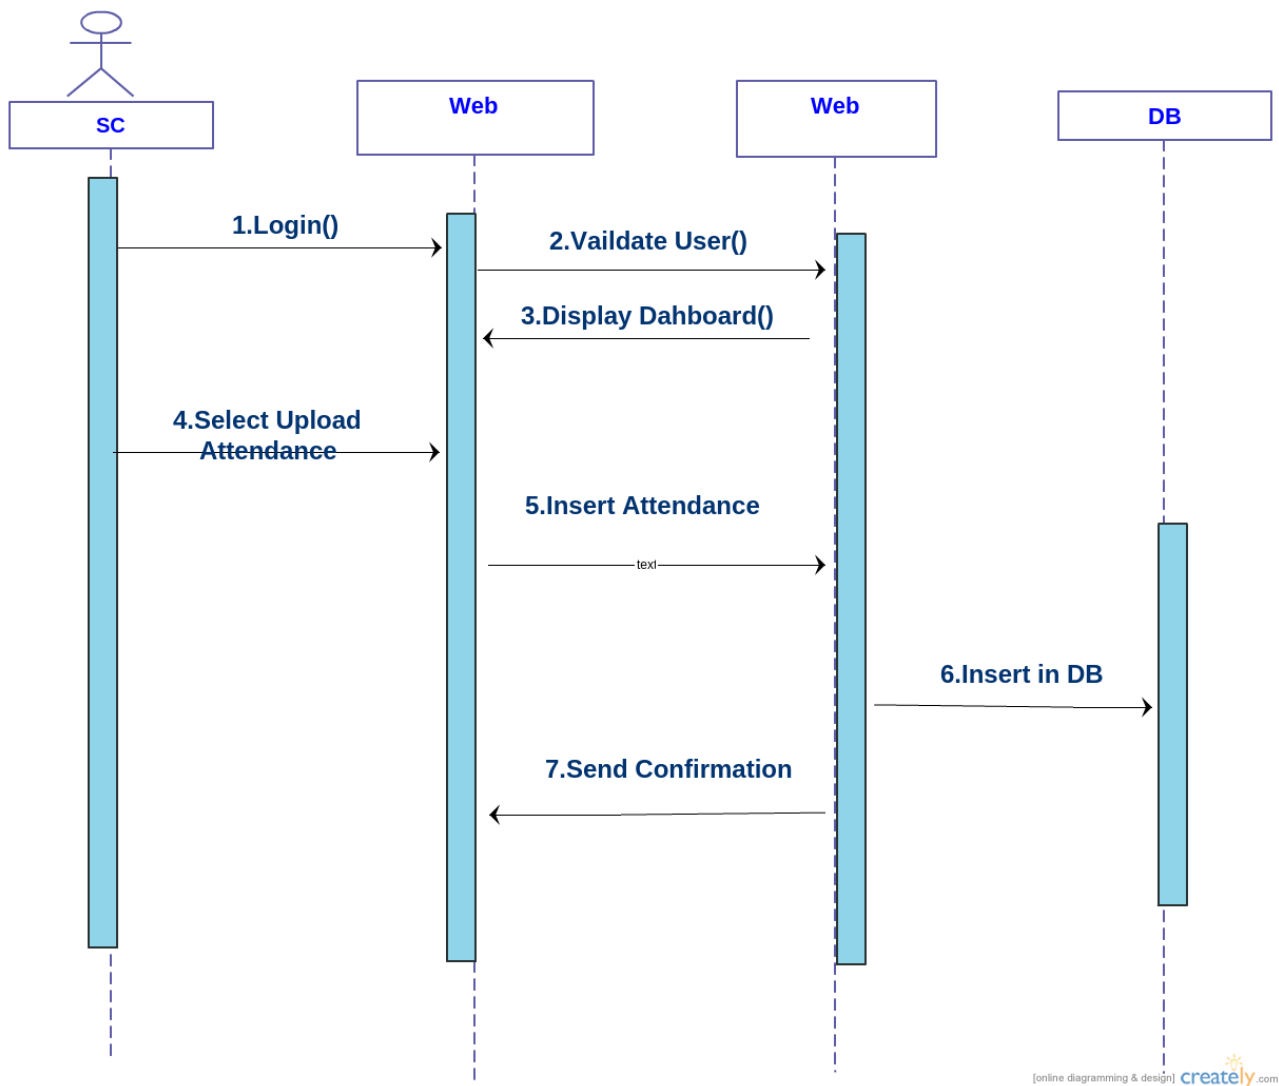

2. News Forum: Ref: AD5

5.) Architecture Diagram

6.) Module Decomposition:

MODULE DECOMPOSITION:

6.1 MESSAGING AND NOTIFICATION ref: R1.4, R4.0, R4.1

This module will implement the functionality of messaging, such as personal message between TI and broadcast messages from HA and TI.

This module will also take care of notifications for various events like profile approval notification, issue status data upload notification.

6.2 LOGIN AND APPROVAL SYSTEM ref: R3.0

This module implements the functionality of credentials based login system where a user requires a login id and password for using our system.

Any new profile registrations are also handled here along with an approval system which requires the user above the hierarchy to approve the validity of the user willing to register. HA will be created by System admin manually.

6.3. REPORTING ref: R5.0

This module implements the functionality of report generation for attendance and marks. These reports can be bi weekly or monthly.

6.4. DATA UPLOAD ACTIVITY ref: R3.0

This module handles the data upload activity related to attendance data and marks data. SC will be using this module to upload data. This module captures dynamic test creation also.

6.5. UI MODULE AND SEARCHING ref R1.0

This module covers the user interface part of the system, like the home screen for various actors in the system and links all the functionality available to them on a single dashboard.

This module also incorporates the searching functionality required by many other modules for different tasks like searching recipient for message etc.

6.6. QUESTION AND ANSWER FORUM ref: R1.0, R1.1, R1.2, R1.3, R1.5

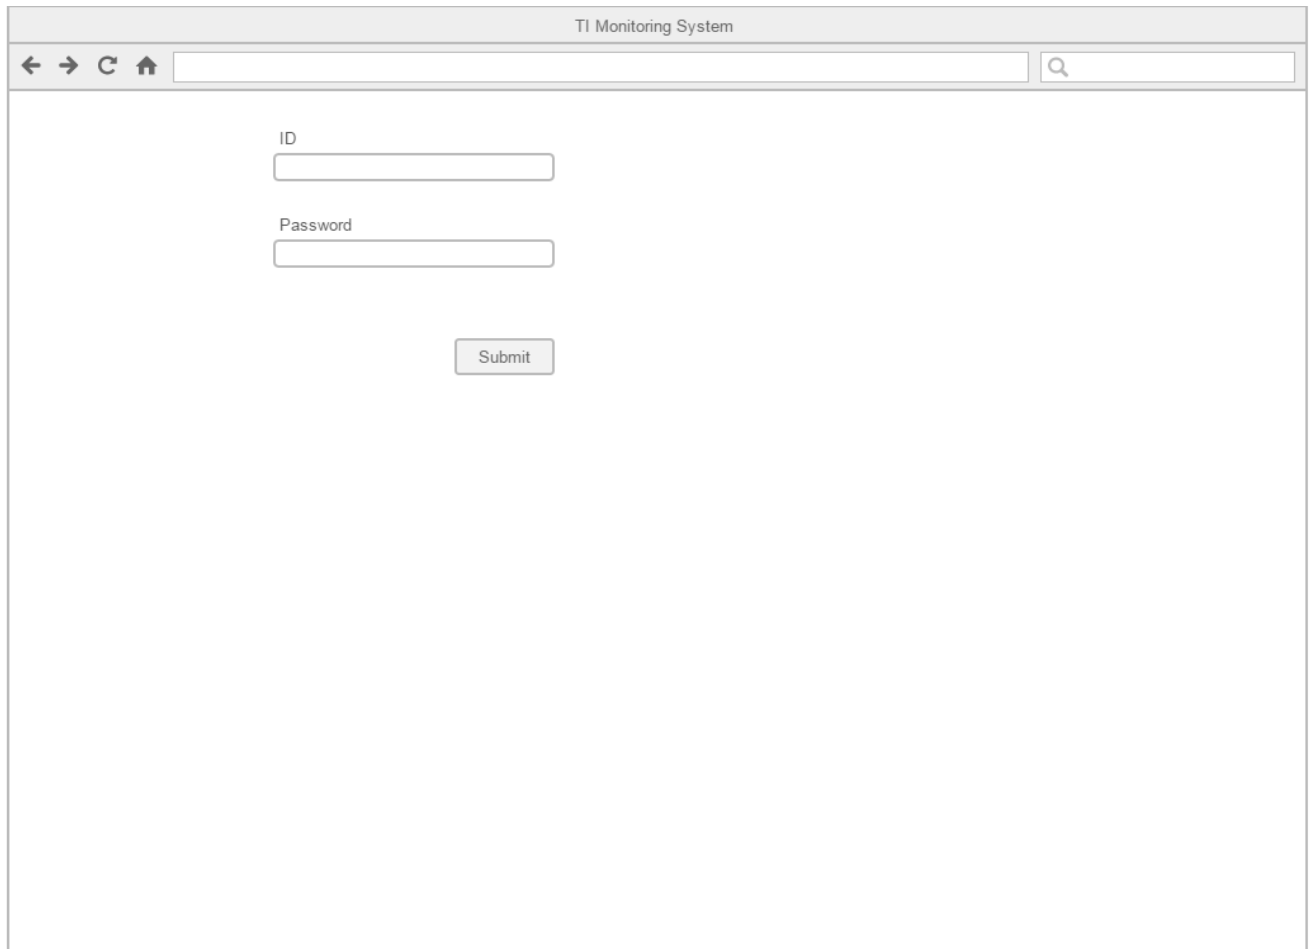

Functionality implemented by this module is to provide a forum for posting question and answer. Here the answer can be up voted and question can be posted based on tags for respective class, subjects and sub topics.

6.7. SYSTEM ISSUE, SMS GATEWAY AND RUNNING STATUS ref: R2.0

This module provides the functionality for issue tracking and class running status. Here a SMS channel is also going to be there for helping in various functionalities.

7.) SCREENS

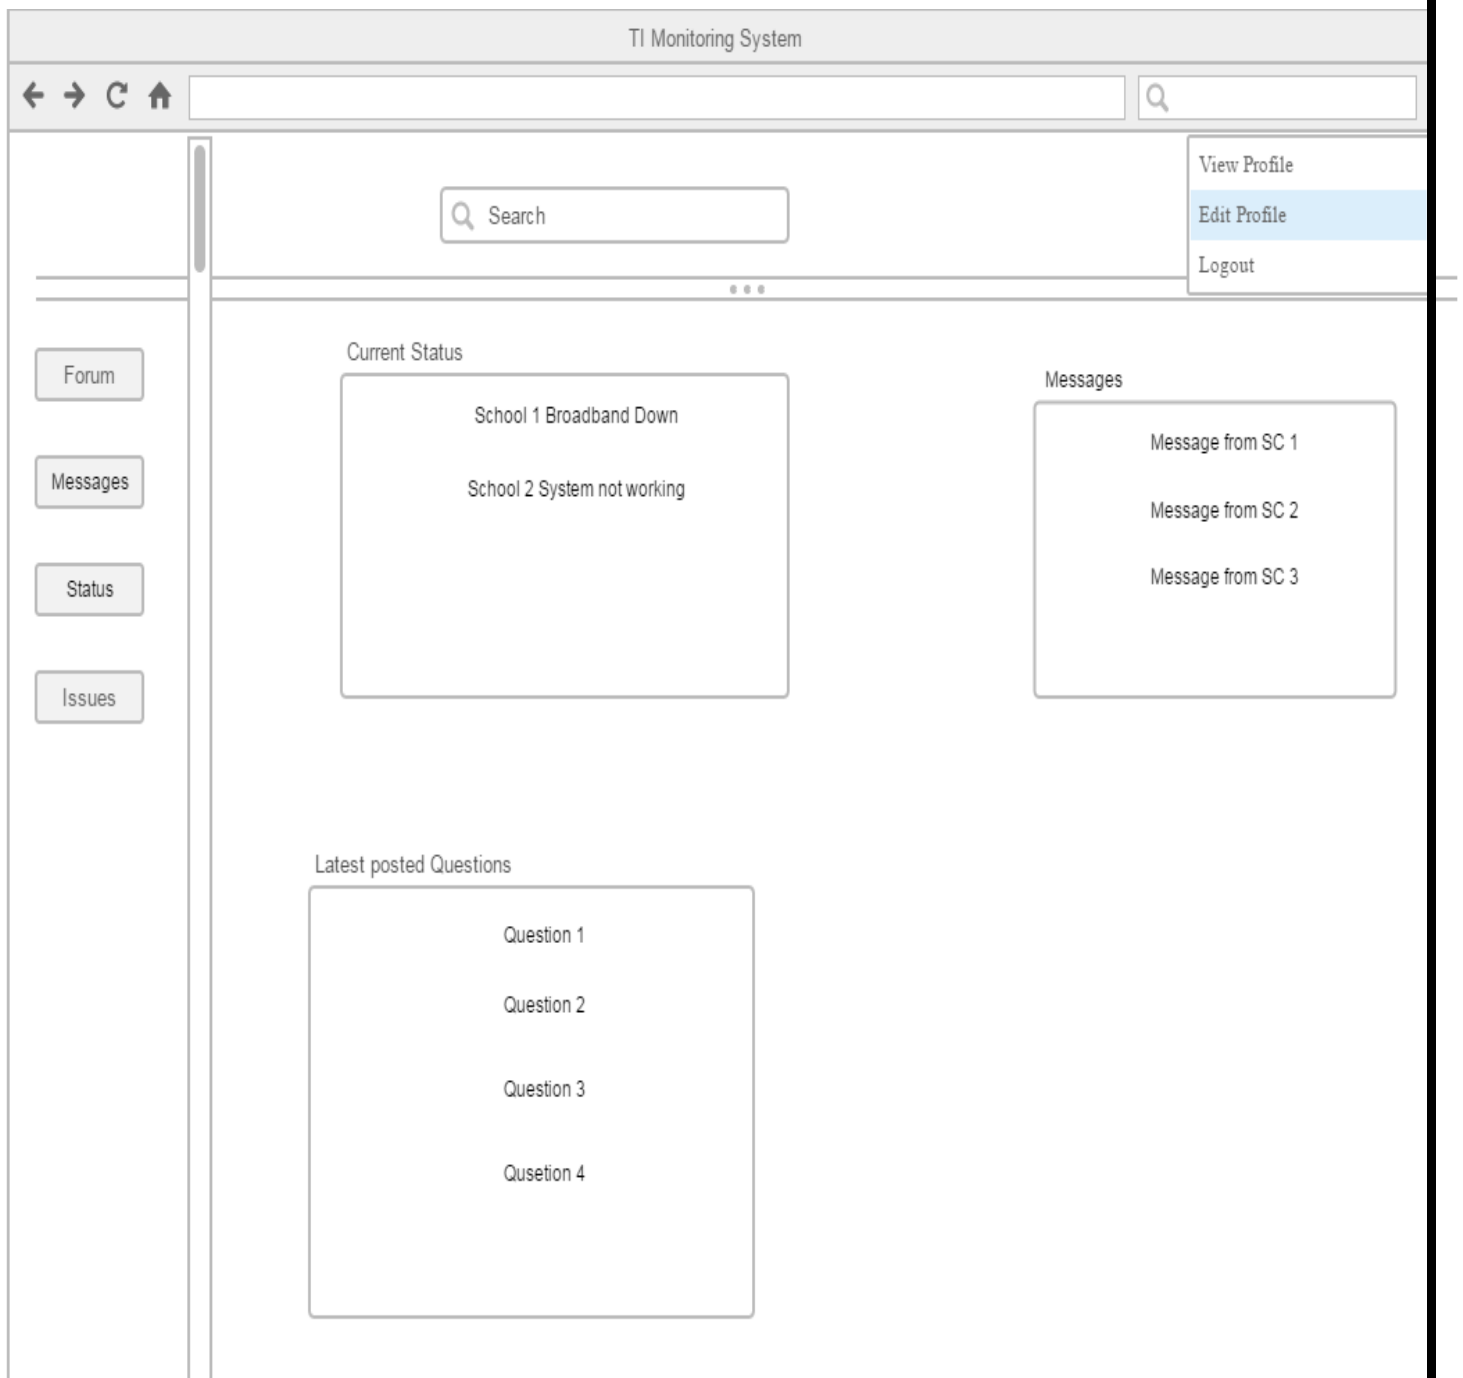

1. Login

The screenshot shows a web browser window titled "TI Monitoring System". The browser's address bar is empty, and there is a search icon on the right. The main content area of the browser displays a login form. The form consists of two text input fields: the first is labeled "ID" and the second is labeled "Password". Below these fields is a "Submit" button. The entire login form is centered within the browser window.

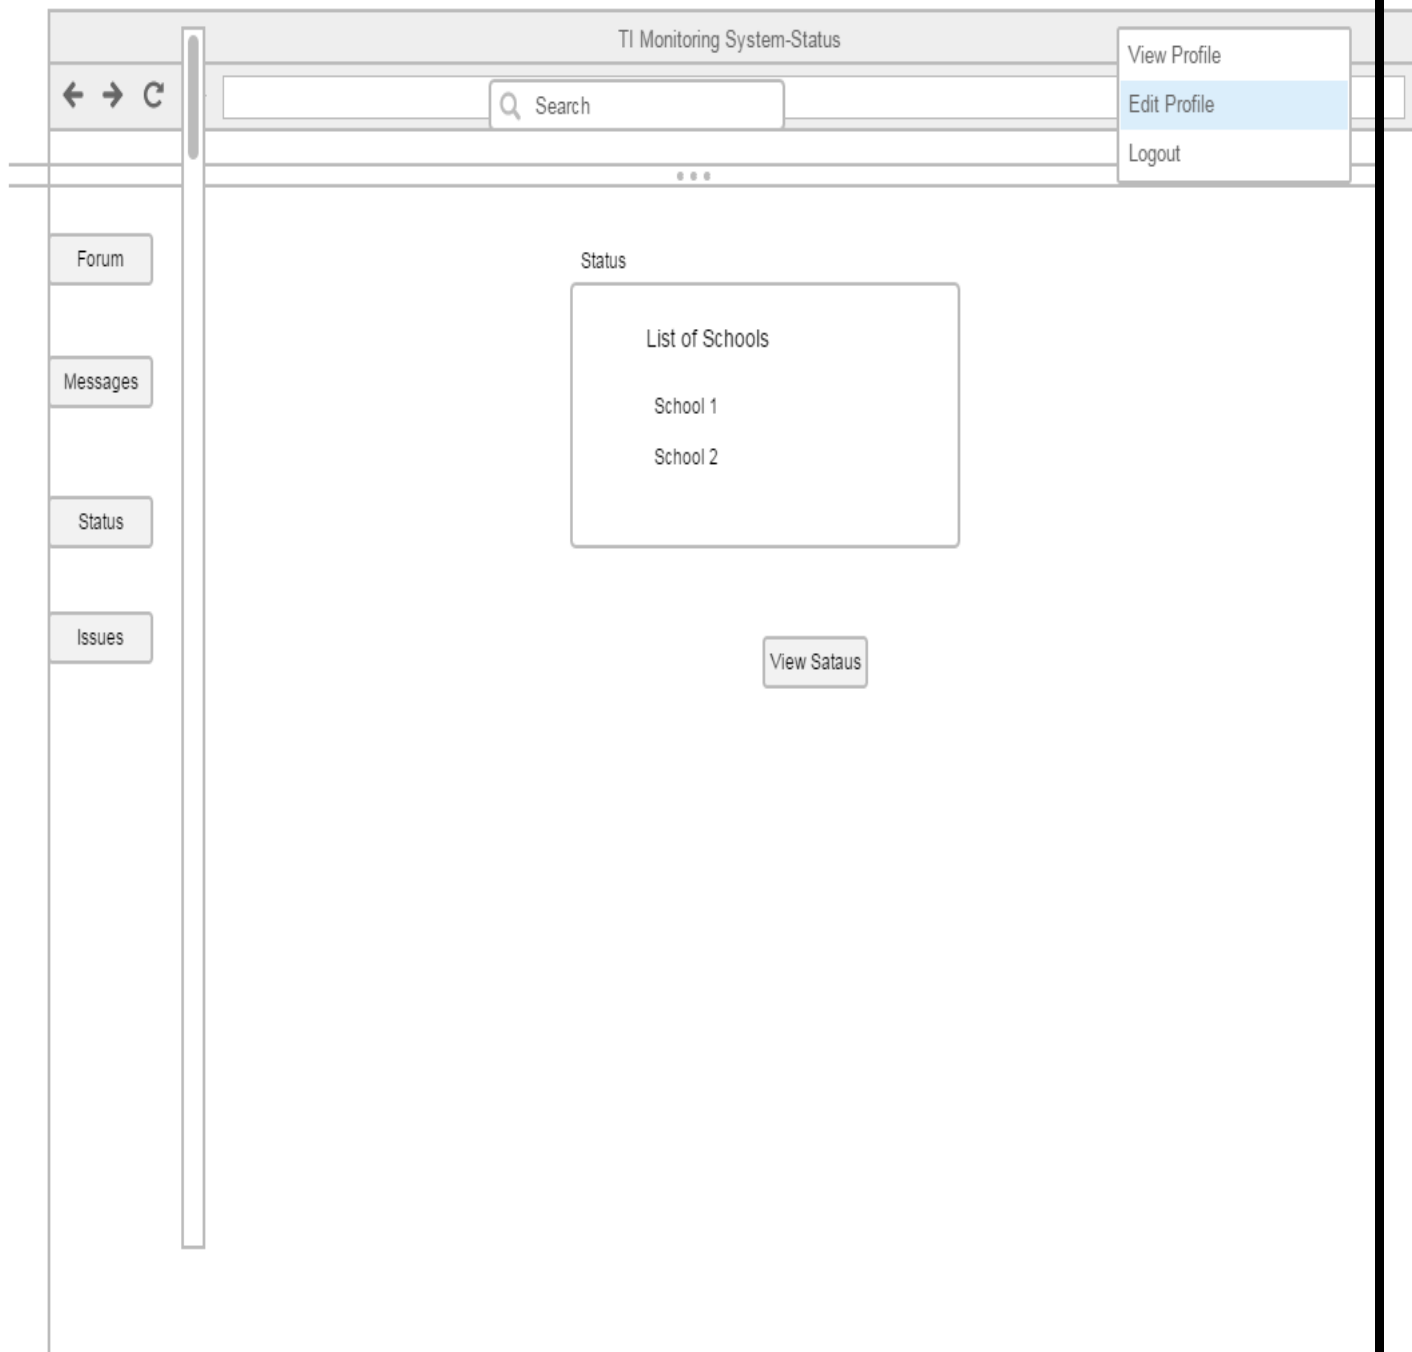

The following screen shows how the user will login into the system.

2. TI Monitoring System

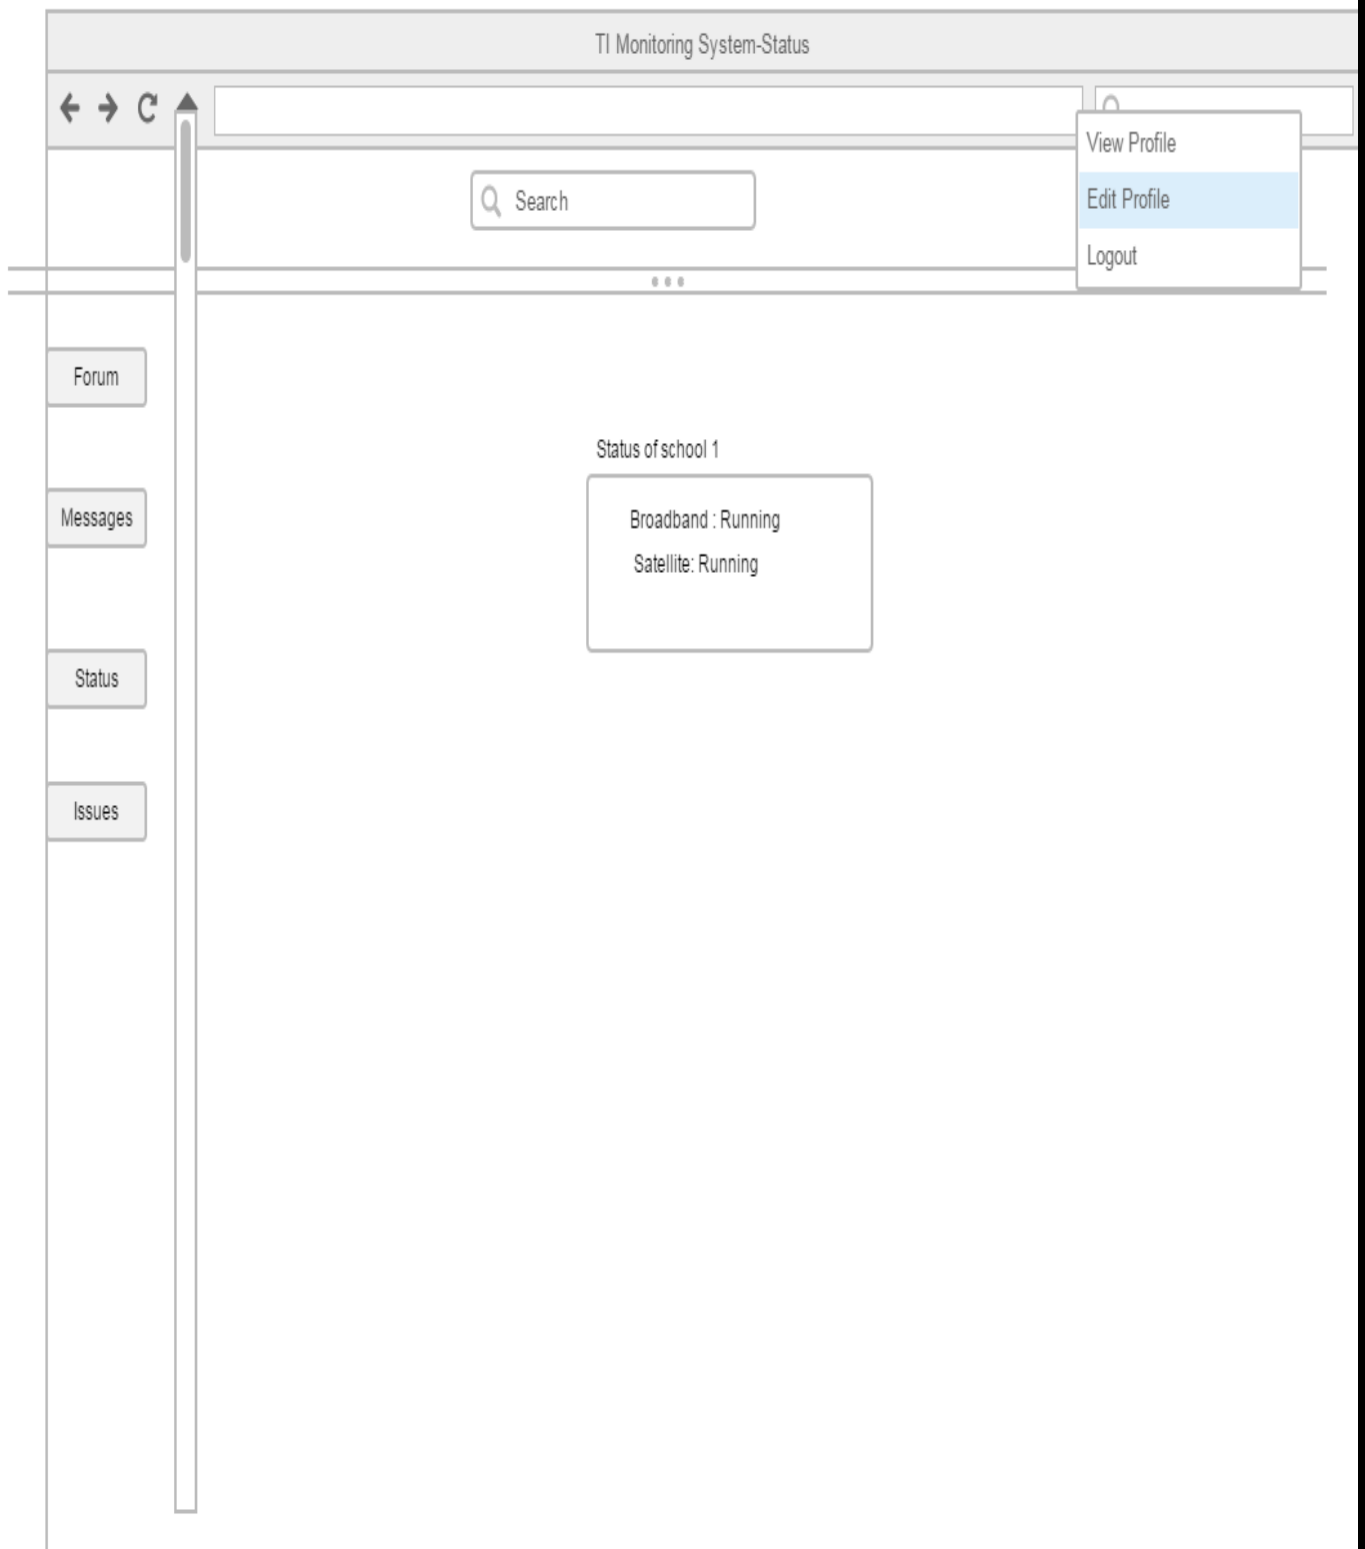

The following activity diagram shows how the TI will get different messages after logging into the system.

3. Database Status

The following activity diagram shows how the TI will monitor whether the data is filled by SC or not.

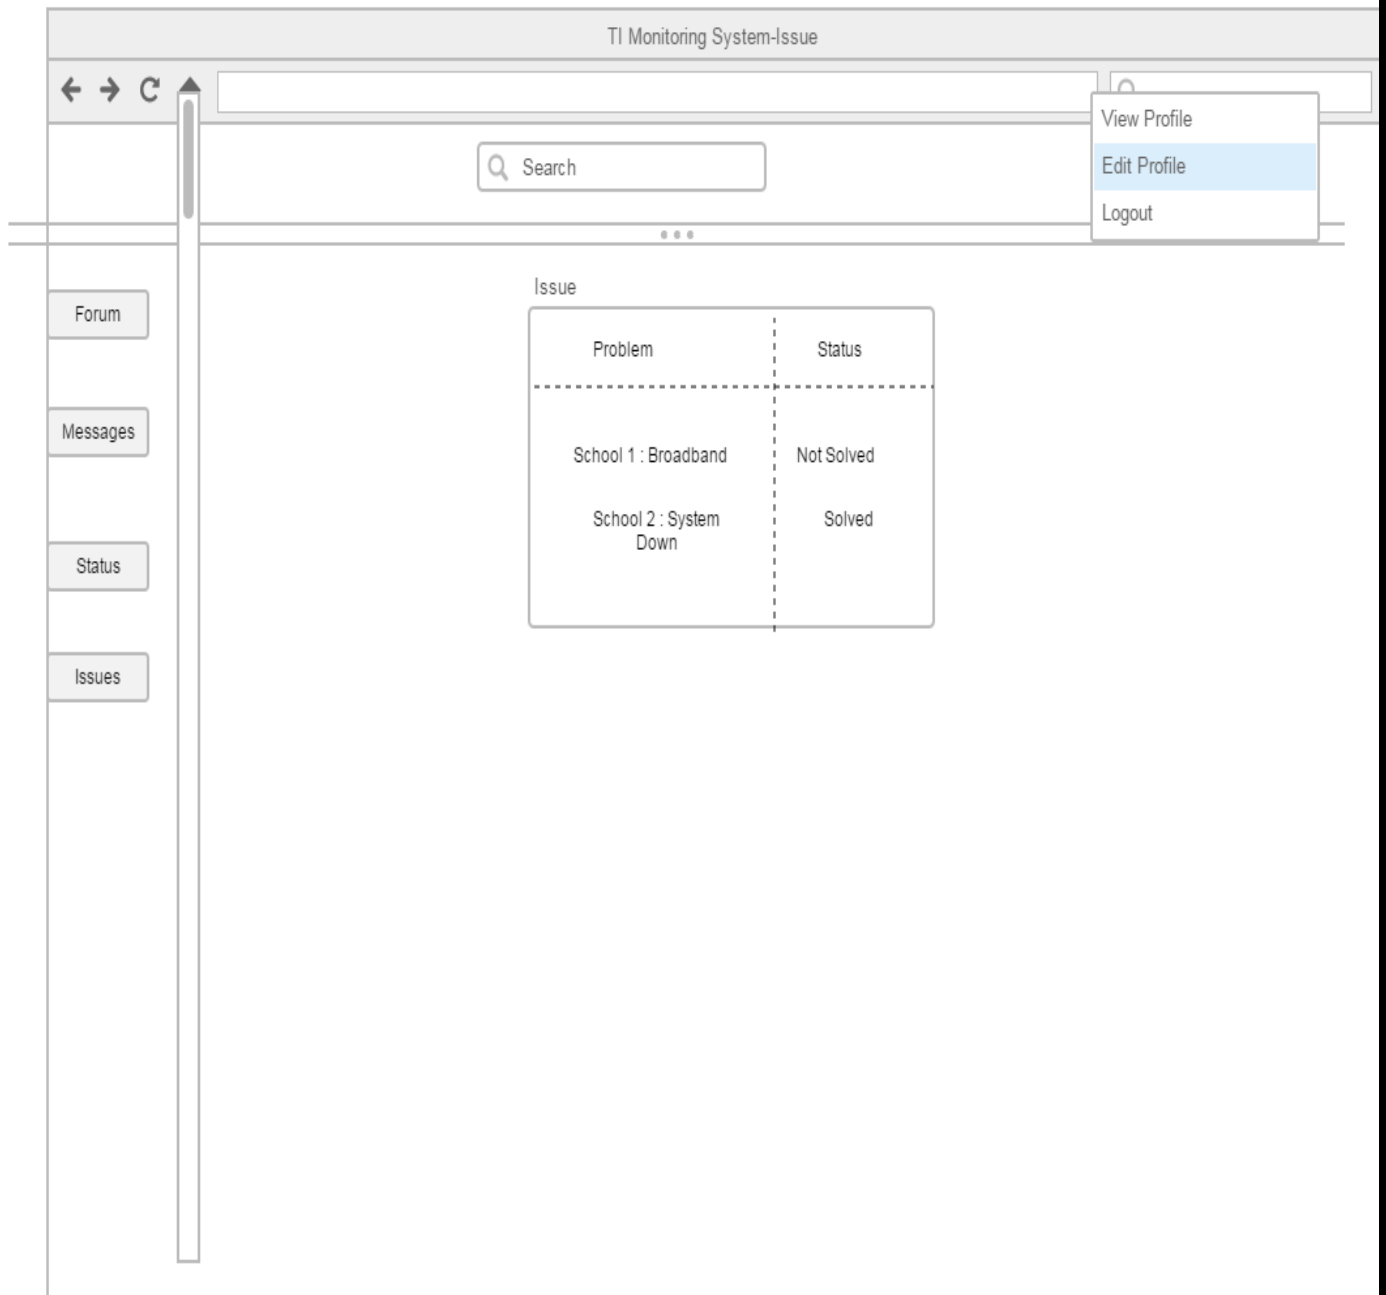

4. System Running Status

The following activity diagram shows how the TI will monitor the system running status of

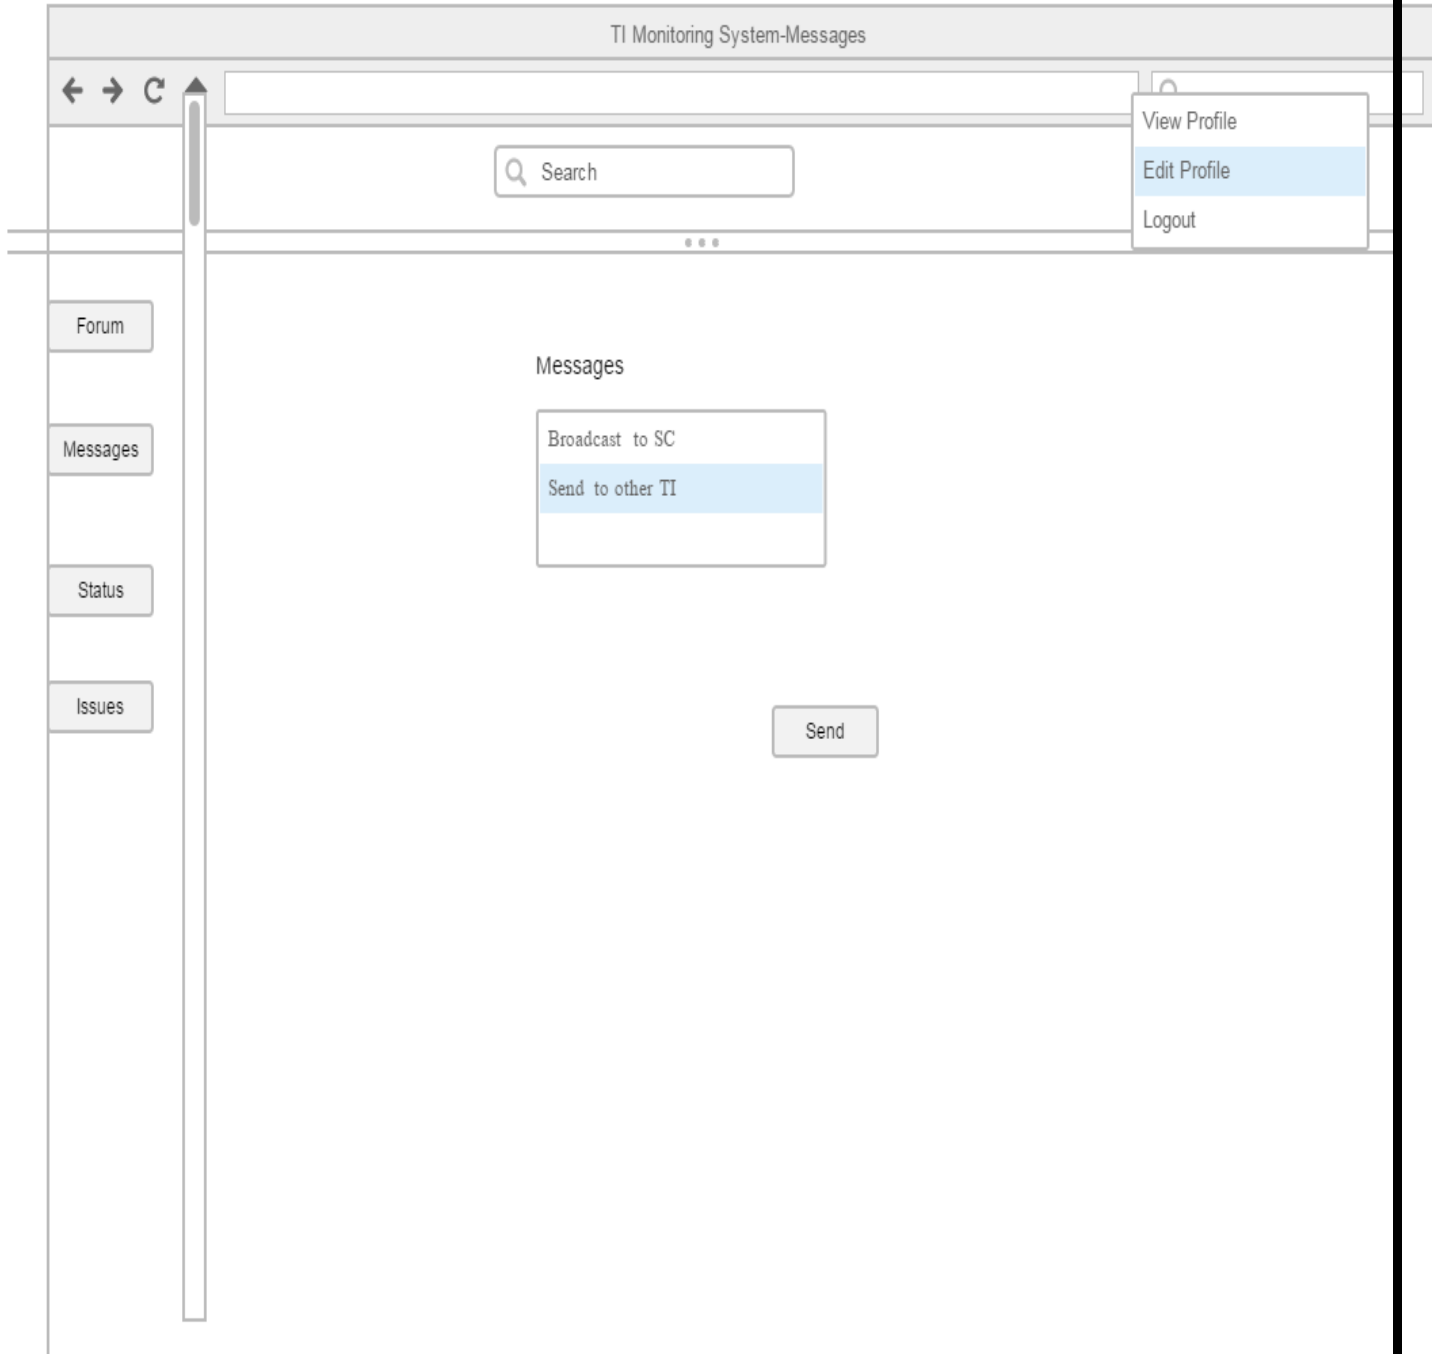

schools.

5. Issue Status

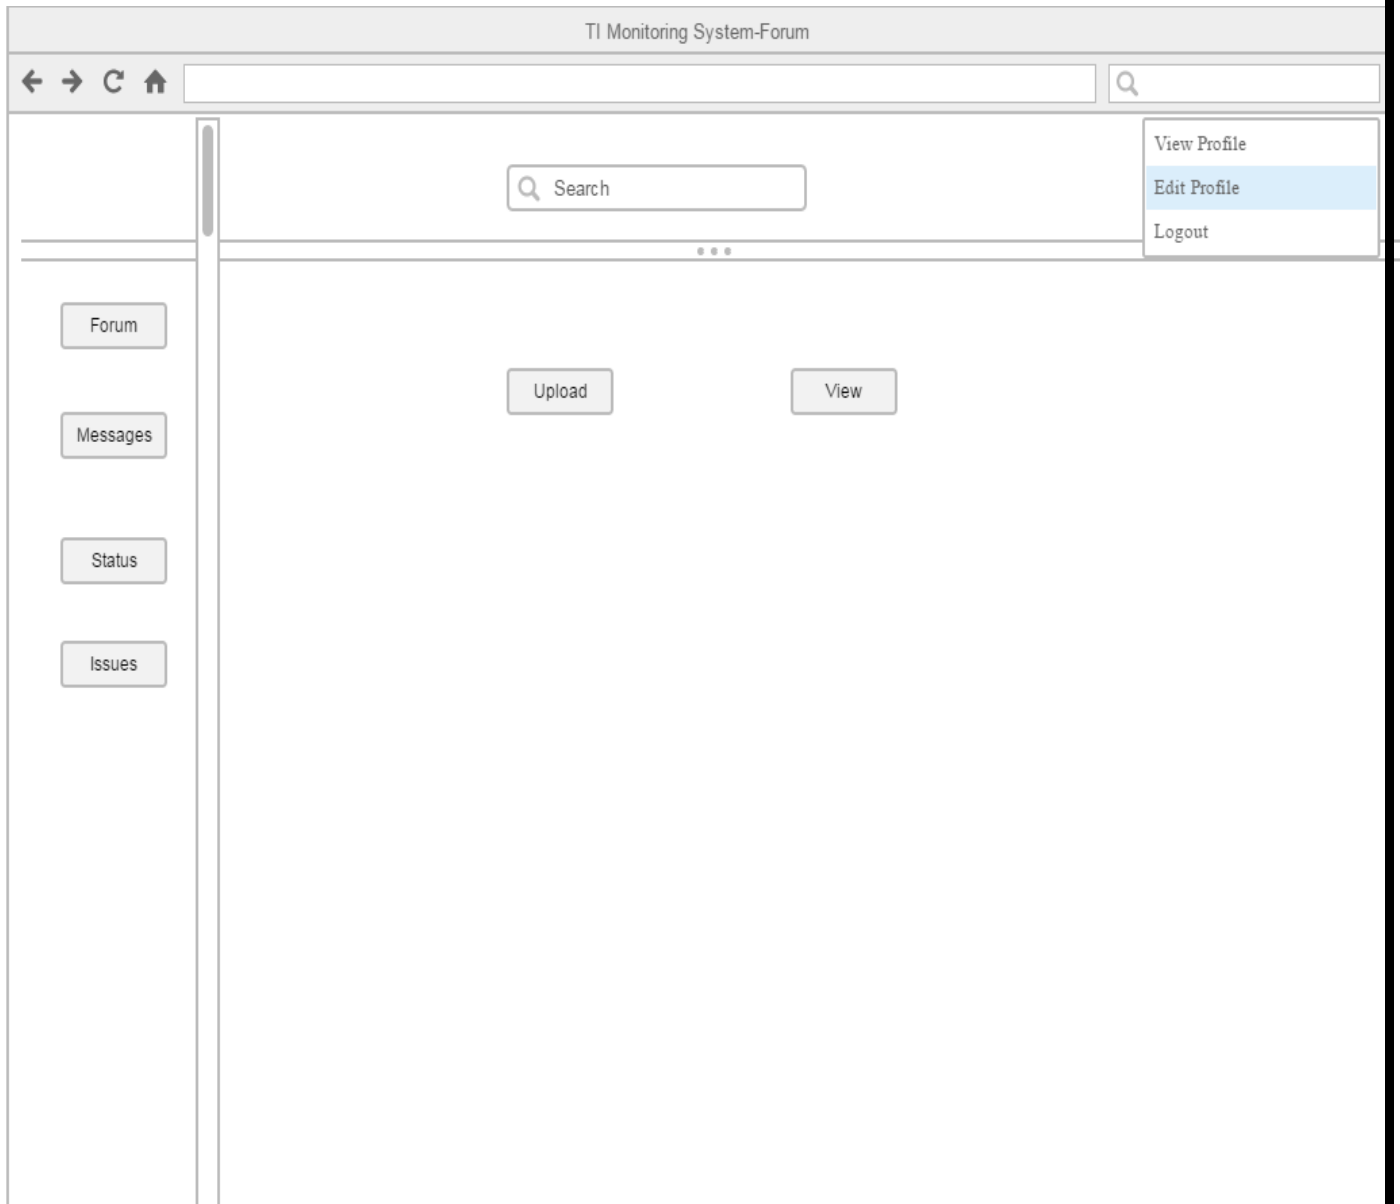

The following activity diagram shows how the TI will report whether the issue is solved or not.

6. Messages

The following activity diagram shows how the TI will send the message to other TI or to the SC.

7. Forum

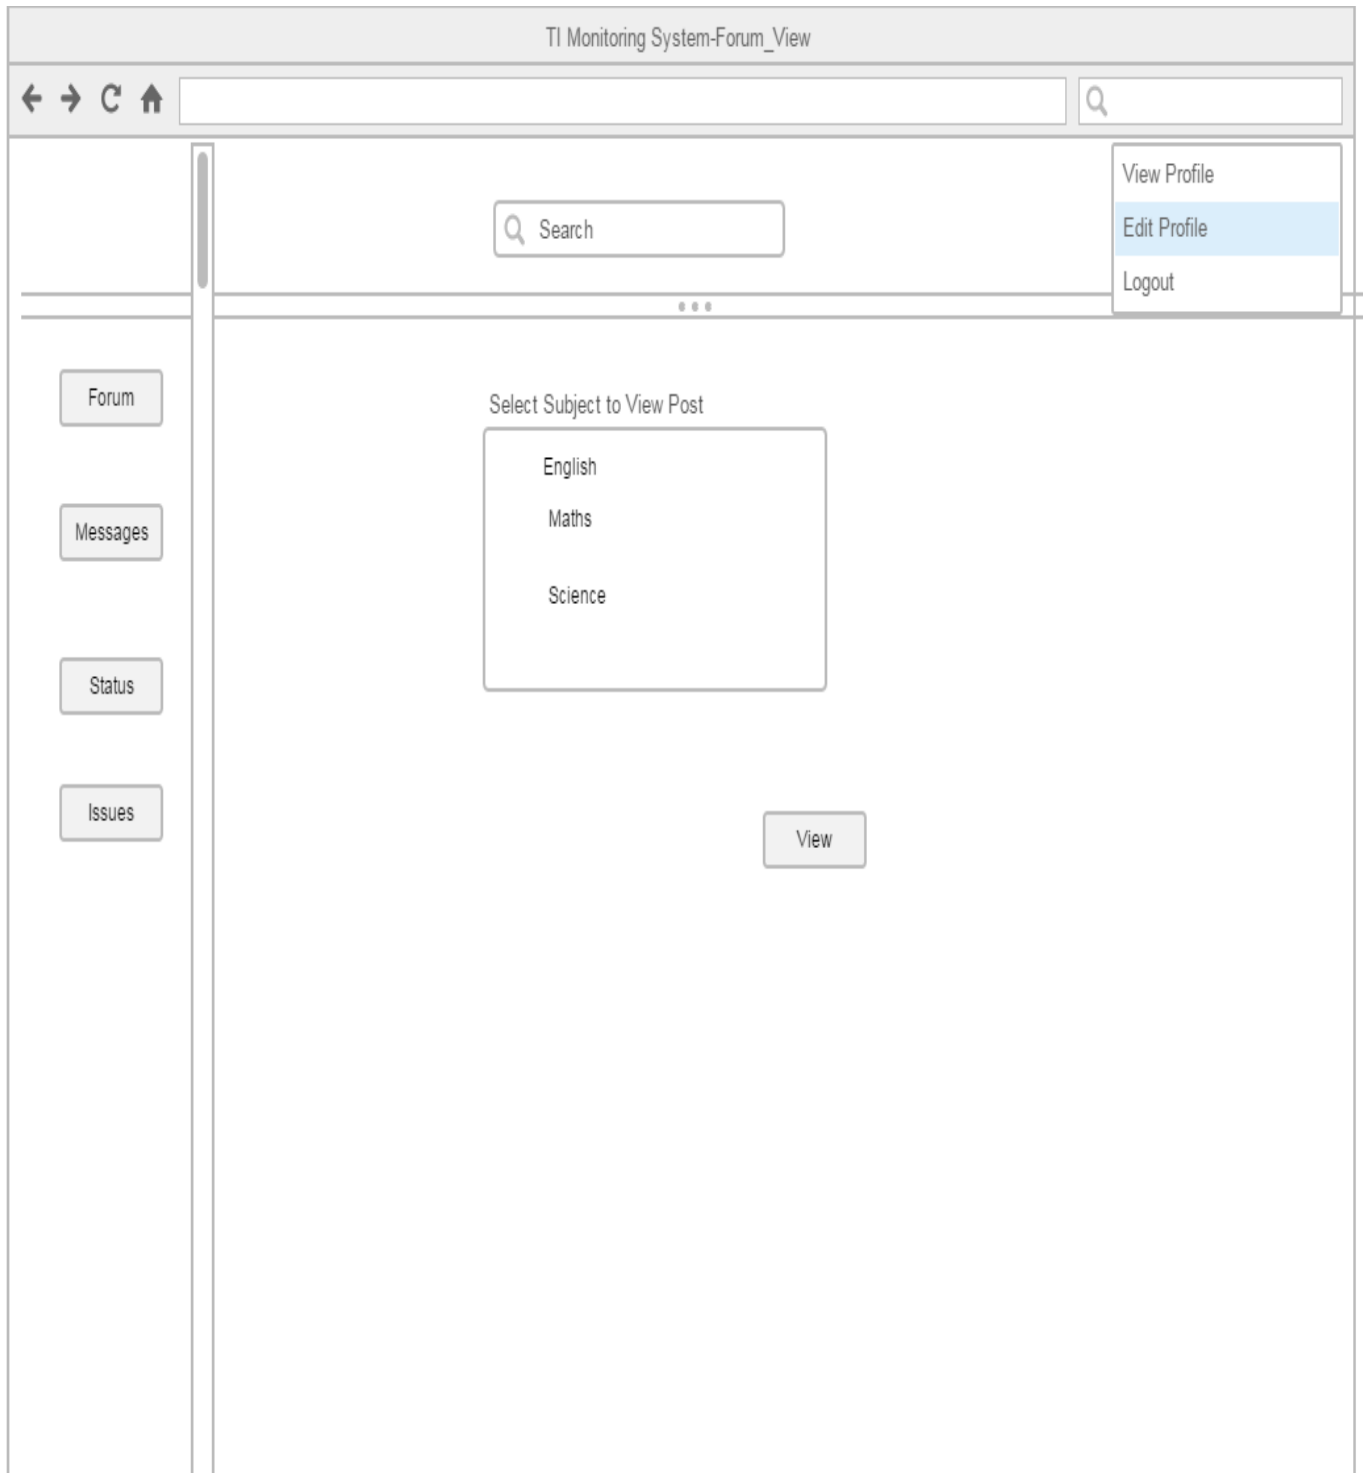

The following activity diagram shows how the TI can upload or view the question and answer.

8. Upload Q/A

The screenshot displays the 'TI Monitoring System-Forum_Upload' web application. The interface includes a top navigation bar with a search bar and a user profile dropdown menu containing 'View Profile', 'Edit Profile' (highlighted), and 'Logout'. A left sidebar contains buttons for 'Forum', 'Messages', 'Status', and 'Issues'. The main content area is titled 'Answer to be uploaded' and contains a form with two input fields: 'Topic Name' and 'Description'. An 'Upload' button is positioned at the bottom right of the form.

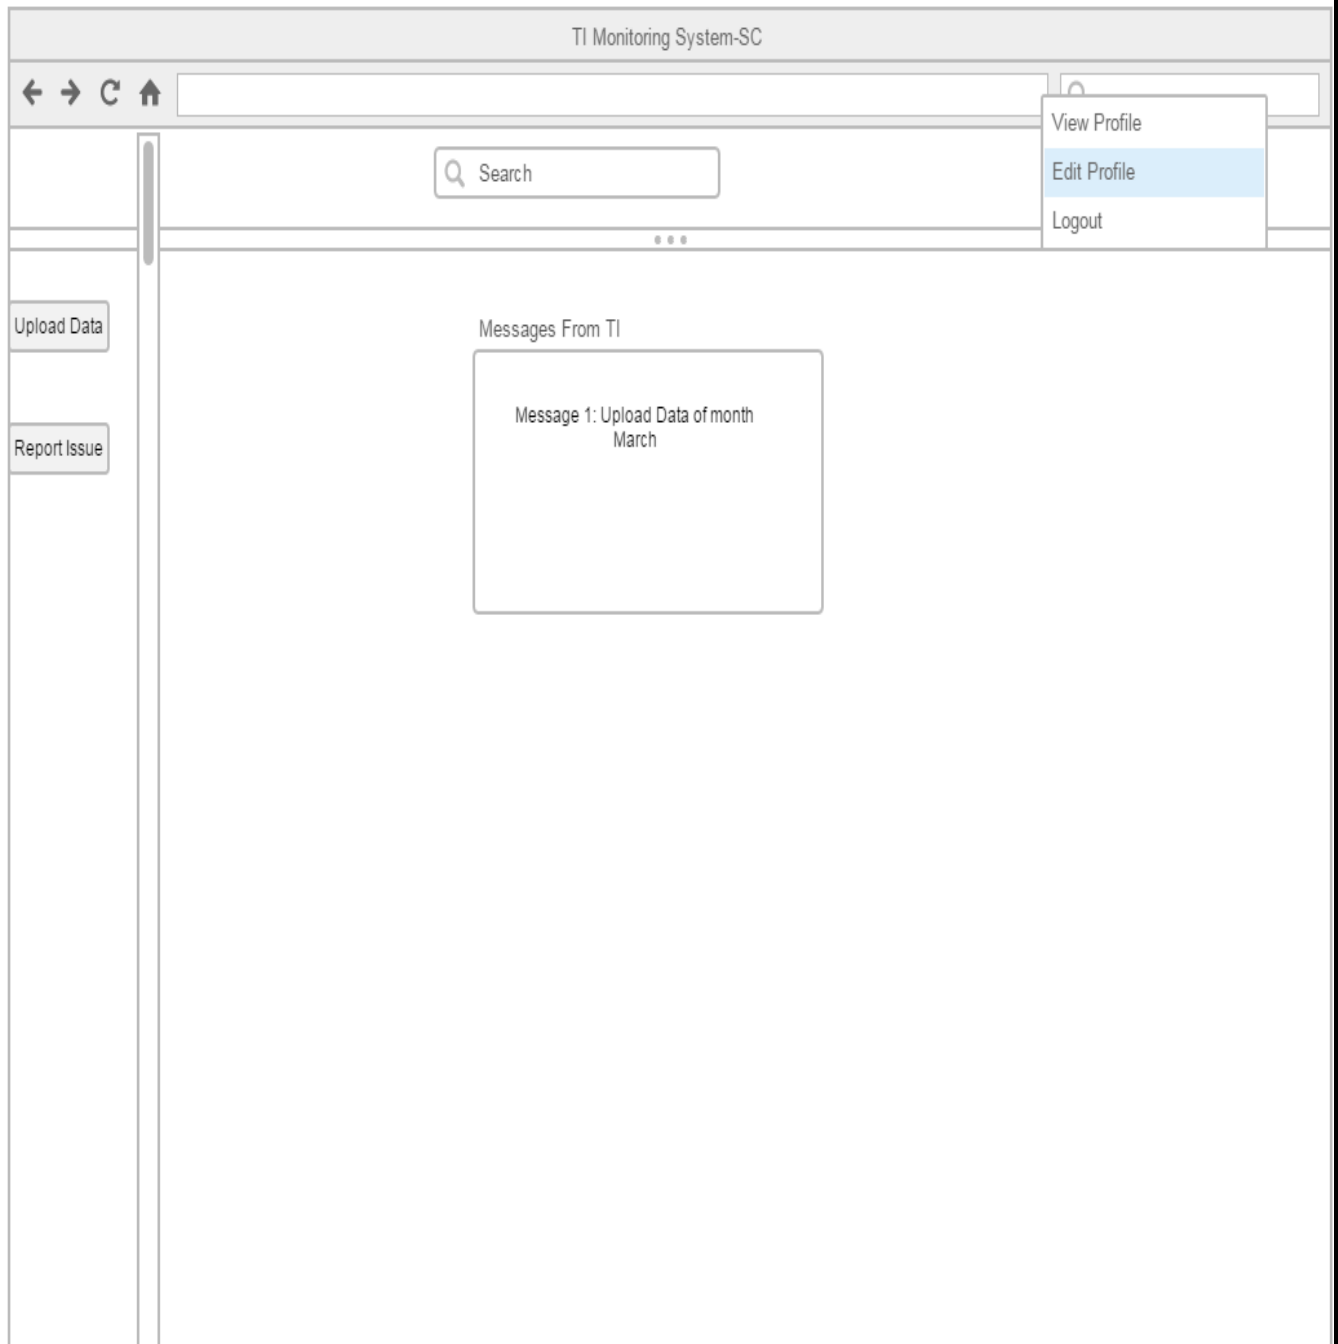

The following activity diagram shows how the TI will upload the Q/A.

9. View Q/A

The following activity diagram shows how the TI will view Q/A uploaded on the forum by other TI.

10. SC screen

The following screen shows how the SC can fill the data of the students.
